

NANOFORCE INFODAY

22.11.2012, Venezia

The NANOFORCE project:

The main objective of NANOFORCE Project is to foster Nanotechnology across Central Europe regions by bringing together Public and Private Organizations (Companies, Research Centres, Venture Capitalists and Public Institutions) to carry out collaborative and interdisciplinary researches on nanomaterials under REACH and to turn the most promising R&D results into innovative markets applications. NANOFORCE is going to launch:

- An innovative ICT Nanotechnology Platform “NANODEALS Generator” to better integrate science, industry, finance, management and regulatory affairs in Central Europe’s regions;
- A guideline to safely manage nanomaterials, completed with examples of Exposure Scenarios and SDS for applied nanomaterials, especially conceived for SMEs;
- A huge information systems to select the right places in the Central Europe where to locate and prosper your own business;
- A Business Plan as a preliminary step to create the “Interregional Nanotech Venture Capital Fund” amounting at €30 Million to support the creation and the growth of startups and spin offs in Nanotechnology

DEVELOPMENT FUND

Nanoforce workshop programme

- Dr. Enzo Sisti, Veneto Nanotech
“Opportunities for research and SMEs in Veneto Region towards hi-tech deals”
- Dr. Paolo Manes, Federchimica
“The dealflow of the Nanoforce as a tool to raise money for the Researchers”
- Dr. Christian Micheletti, Veneto Nanotech
“The «Nanoforce Valleys» : how the territories could attract investment”
- Dr. Jörg Klein, Chemie Cluster Bayern
“The experience of a chemical cluster to enhance the added value chain from large groups to SMEs”
- Dr. Sonja Hartl, Bionanonet (Austria)
“How to move from the Regulatory constraints to responsible nanomaterials management”
- Question and Answer
- Conclusions:
Dr. Enzo Sisti, Veneto Nanotech
“*Next steps of the Nanoforce Project*”
